## Summary

Front-end developer with **3 years of experience** in Web Development, Proficient in **[HTML, CSS], JavaScript, NodeJs** and **Reactjs & Nextjs** Ecosystem, also have experience in Back-end, **published 23+ real projects in GitHub**.

## Work Experience

### OPTIMIZA Digital inc

Kitchener, Canada (Remote)

FRONT-END DEVELOPER

Jun. 2021 - Feb 2023

- Built a **multi-functional** dashboard it used as a **content management system**, the main purpose for it to connect projects with each other using [Restful APIs], The dashboard was handling **more than 40k users** using :[Umijis, React, Dvajs, Antd.]
- **Raised company income** by building **14 different landing pages** for a big event in a short time using static (HTML,CSS, and JavaScript) .
- Boosted dashboard **performance by 60%** through optimizing and implementing web-cache and serverless API using [Dvajs, Tanstack, and React].
- Built a special feature where any employee can **export any table of data in the dashboard to an Excel sheet**, it saved time for other employees.
- Implementing a **translator system (I18)** for localizing, **four languages** were localized **without affecting the performance** of the project.
- **Boosted company productivity** and saved time for other employees by setting up an **auto deployer using [CI/CD]** with Bitbucket pipeline and Firebase functions.

### Freelance

Remote

FULL-STACK DEVELOPER

Jan. 2019 - Jun. 2021

- Developed an **Automated system** by using (**Netlify, Github Actions, and Firebase**), When the client requests a live demo of the website, the system will **deploy the website automatically** in Netlify servers.
- Built **three kit-starters, 1- (MERN stack)** : for complex systems, **2-(React & Redux)** : for projects that don't need a back-end, and **3- (Gatsby)** : for SEO friendly & landing pages, after building these kit-starters the project build time has been **reduced by 43%**.
- Built a dashboard where every project **will be in connection with the dashboard** to give certain data and the system will **automatically analyze these data and send the results** with a beautiful user interface **to the client every week**
- Built an API for test purposes with [Create, Read, Update and delete]-CRUD system included using (Express , NodeJS, and mongoDB).

## Projects

### Dashboard Project

- Technologies that were used in this project: [ **React, Less, Redux, AntD, Charts, Router, Axios**]
- Built a smart system used as a base for the project that can import **routes, inject reducers** to Redux store, **create a menu item** in the slide bar, implement **Breadcrumb system** inside the project, and custom layout, all these features exist through define **one JavaScript object**.
- Built a dispatcher system on top of Redux can **dispatch reducers and APIs** with just one line of code without defining actions, also it can **create a Redux slice** in one single line of code.
- Adjustable dashboard ( Theme, Name, Content ) All these elements are changeable as well as layouts and a custom layout for every page.
- **Used Less variables** in the project, **the theme** can be changed in one single line of code [Primary color, Font family, Border radius, and more], also has a babel-loader to make all the browsers **support the old JavaScript ES5**.
- Set up WebPack with these loaders (less, Sass, CSS, and JavaScript), also the project can be built to production with **one JavaScript file and one HTML file**.

### Integrator project

- Technologies that were used in this project: [ **Astro, Tailwind, MDX, Varcel**]
- **Open-source** project solve the difficulty of **integration in certain services** in Web technologies with more than **55+ services in 11+ library and framework**, with a beautiful UI/UX design and **more than 5 layouts** could be use and **more than 30 components** .
- High-performance landing page score in **Lighthouse and PageSpeed Insights 100%** in all five categories including Mobile and Desktop version.
- **Headless Components, Dark theme & Light theme** and **Customizable theme** easy to adjust the color palette and the content of the project with Tailwind variables including blog system and integration pages, also it has a built-in Google Analytics.

## Technical Skills

HTML - CSS - LESS - SasS - ANTD - Bootstrap - Tailwind - Javascript - Typescript - API - Astro - GatsBy- Jest - unity testing - Babel - Git - React

Nextjs - SSR & SPA & SSG - Webpack - vite - Redux - GraphQL - Nodejs - python - PHP - WordPress - Express - MongoDB - Firebase - AWS

## Education

University of Tikrit(Business administration management bachelor)

Mar. 2022 - Aug. 2026
